

MOSI

Museum of Science and Industry
Tampa, FL

Assessment

Hillsborough County, Florida, retained MMC to conduct an Organizational Assessment of the Museum of Science and Industry (MOSI) in order to provide the analysis and recommendations needed to enhance MOSI's financial sustainability. The MMC team travelled to Tampa to observe operations and conduct confidential interviews with County staff, MOSI board members, staff, "stakeholders," and community leaders about MOSI and its finances, programs, institutional presence, and service to the community. MMC also studied the internal business operations, the relationships between operating and support divisions, and the relationship of MOSI to the County. The Organizational Assessment is a public document and may be downloaded [here](#).

Following the issuing of the assessment report, MMC was hired to conduct a search for MOSI's next Executive Director, and once again to complete a feasibility study of moving MOSI from its current location in Northeast Tampa to the heart of the downtown.
